1. The following is an examiner's statement of reasons for allowance: the prior art does not adequately disclose a system or method for differential coherent combining of received signals in an electronic article surveillance system comprising removing transmitter phase variation from a received signal, filtering received signal with plural filters each having preselected bandwidth and center frequency, combining by diversity averaging each of plural filtered samples, and quadratically detecting each of the filtered samples by squaring the diversity combined samples and summing to arrive at a differentially coherent combined signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okanobu, Mays, Balch, Lowe and Gardenfors disclose EAS and tag signal systems.
